allwin's Quick-Fresh Towel Dispenser dispenses a disposable, rolled, warm and moisturised all natural towel at the touch of a button. The towel roll, the auxiliary product, is made of non-woven fabric manufactured from 100% natural plant fiber. Hot, soft and single use towels could be dispensed after cutting, watering, heating & rolling. The towel dispenser is perfect for Hotels, Hospitals, Restaurants, Bars, Beauty Parlours, Country Clubs, Restrooms, Exercise Rooms, Pool Areas, Living Rooms, Bedrooms, Dining Rooms, Bath rooms, Kitchens and Break Rooms etc. As cellular phones and computers, **allwin's Quick-Fresh** Towel Dispensers and Towels will become a product which the world can't live without it once acquired.

With qualities like economy, hygiene, time saving, labor saving and environment friendly, **allwin's Quick-Fresh** Towel Dispenser assures a commendable future. This Towel Dispenser has been covered by major TV channels and Newspapers across the world and is currently sold in Europe, United States and many other developed countries. No doubt this machine and towels will revolutionize the industry.

allwin's Quick-Fresh Towel Dispenser is an intelligent electrical appliance to make sterilized, fresh and sanitary, hot/cold (60°C) comfortable single use towels.

allwin's Quick-Fresh Towel Rolls are made of non-woven cloth manufactured from 100% natural plant fiber with high-tech equipment. Up to 120 pcs of towels can be made from one roll. So the cost of a towel is so negligible and economical.

allwin's Quick-Fresh is Convenient: One touch operation to get a hot or cold towel. Indicator alarms incase of lack of towel or water in the machine.

allwin's Quick-Fresh is Environment Friendly: The towels are made from 100% natural plant fiber and will be degraded naturally.

allwin's Quick-Fresh is Fresh and Hygienic: Intercross infection is avoided by the antibacterial water box, UV sterilizing and single use.

allwin's Quick-Fresh is Economical: The dispenser is energy saving. Towels can be made any time as you wish and hence no waste.

allwin's Quick-Fresh is Time Saving: It takes only 5 seconds from press of a button to have a towel. And only 3 seconds needed when continuously used.

allwin's Quick-Fresh is Beautiful: The dispenser features compact design, light weight and beautiful outlook. Various colors of machines and towels are available to be chosen from to match the interior of your home or office.

Advantages

The hot towel dispenser provides hygienic fabric towels, the latest in hotel-restaurant- hospital supplies. The hot towel dispenser offers a more economical and useful way of providing hygienic wet towels than the old alternatives such as individual wipes or sachet wipes.

allwin's Quick-Fresh hot & wet towel is no doubt the latest in restaurant supplies. As well known to every one in the food and beverage industry, providing personal hygiene products are extremely important to every client to maintain hygiene before and after meal.

The hot & wet towel dispenser **allwin's Quick-Fresh** has many remarkable advantages. Customers can enjoy a unique hot and wet towel for a refreshing feeling, which is always a preferred starter everywhere.

For the entrepreneur, **allwin's Quick-Fresh** hot & wet towel dispenser gives some additional privileges such as customer satisfaction by adding value, contribution to the beauty of the office by its unique and attractive look, monetary benefits due to its low consumption of water and electricity.

The cost of a hot & wet cotton towel ranges between KSh 2.5 to 3.2 depending upon the length of the towel.

The ordinary re-usable towels are washed after every use and softened using chemicals, dried and ironed which is expensive and labor oriented yet not 100% hygienic. Every year millions of tonnes of detergents and chemicals contaminates our water sources as a result of washing hotel cloths.

Hot towels or Sachet wipes / paper napkins?

In restaurant supplies where personal hygiene is essential, it is obvious that a hot and wet towel can't be compared with sachet wipe or any individual wipe that can't remove food stains. A hot & wet towel is enough to remove any greasy food stains immediately as they are large enough. Length can be adjusted according to one's requirement. Sachet/ paper napkins are small and spent in dozens and the entrepreneur will end up in spending more.

For a face wipe, it is obvious to use a hot and wet towel which refreshes rather than any sachet wipes or individual

wipes. **allwin's Quick-Fresh** towels are 100% natural fiber and are wetted with *preservative free water* just prior to dispensing. So the towels are safe to use on face or hands. Many chemicals used on the other wipes may cause irritation and damage to the skin.

allwin's Quick-Fresh hot towel dispenser allows users to control the towels temperature, length and humidity according to their requirement. But in sachet / paper wipes user preference is impossible in adjustment of length, temperature, humidity etc.

Remarkable features

- Automatically provides a hot, cold or room temperature towel in a touch of a button
- Provides hygienic and refreshing wet wipes
- Towels can be scented as per the client's choice
- Easy Operation
- Environment-friendly, the towels are 100% biodegradable, soft yet strong material
